

Shelving and Racking

- Flexible, automatic and versatile designs are what sets Samco apart.
- Having the ability to produce a wide range of products with minimal setup time is key to our innovative designs.
- Our customers have come to rely on our experience and product knowledge to help them achieve their goals.

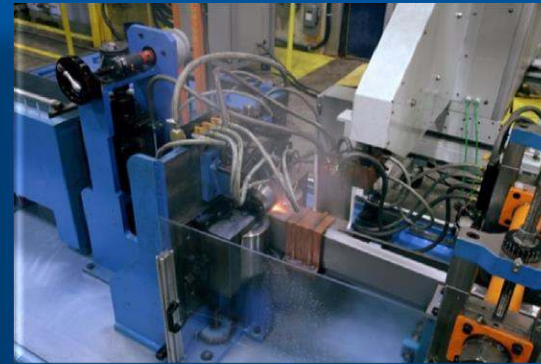

Step Beam with Inline Welding I

Robust design Universal rollformer for all sizes of step beam welded inline (at 12 O'Clock) with HF induction welder and cut to length on the fly for continuous operation and higher production rates.

Key Features:

- Quality Hi Carbon & Hi Chrome tool steel combo
- Flood coolant system for quality surfaces
- Inline solid-state HF welder w/squeeze box
- Hydraulic flying cut-off press system
- Closed loop length control system
- All electrics have Plug & Play capability with quick disconnects

Step Beam with Inline Welding II

Benefits of this Rollformer Include:

- All sizes roll tooling set for extended tooling life
- Flood coolant system reduces contaminant pick up on the rolls
- Cooling trough and welding mechanicals for continuous welding
- Continuous operation and higher production rates
- Tighter part to part tolerances
- Easy installation and maintenance

Step Beam Line Layout
