Building & Construction Industry Solutions

Rollforming solutions for structural, roofing, cladding and framing applications.

Modern construction demands precision, consistency, and scalability across a wide range of structural and architectural components. Production solutions built to support high-volume output, complex profiles, and evolving construction requirements.

Construction Applications

Samco supports the production of structural, roofing, cladding, and framing components across building and construction applications.

Structural Framing

- Steel studs and tracks
- Floor and ceiling joists
- Purlins and structural channels
- Hat channels and furring systems

Roofing

- Standing seam panels
- Corrugated roofing sheets
- Roof deck profiles
- Ridge caps and flashing profiles

Wall Cladding & Façade

- Siding metal panels
- Cassette and rainscreen systems
- Ribbed and trapezoidal wall panels

Door & Window Framing

- Curtain wall components
- Window frame profiles
- Door frames and jambs
- Lintel and sill sections
- Fire Rated Doors

Core Rollforming Capabilities

Steel Framing Lines

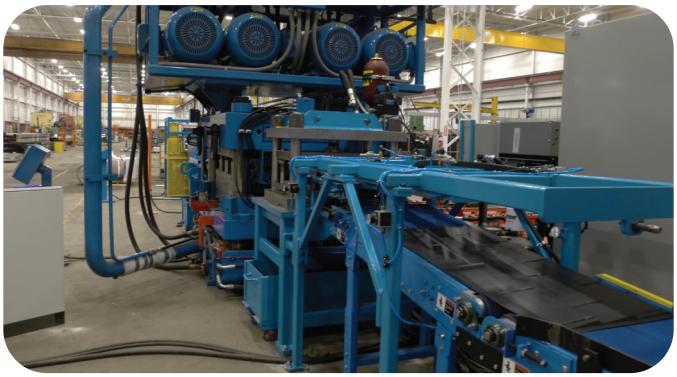
Solutions designed for high-speed production of studs, tracks, joists, and structural profiles.

Key Features

- Multi-profile capability
- High-speed production
- Powered width adjustment
- Integrated punching and notching
- Consistent dimensional accuracy

Roofing & Cladding Lines

Engineered for production of roofing panels, cladding systems, and architectural profiles.

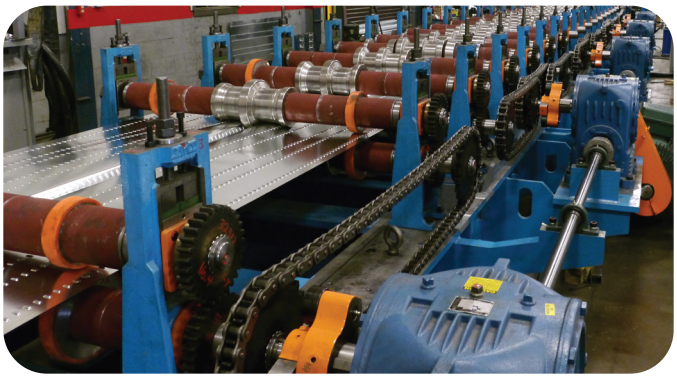


Key Features

- Standing seam and corrugated profiles
- Compatible with pre-painted and coated materials
- High-speed or standard production rates
- Flexible profile configurations

Decking & Structural Lines

Rollforming solutions for structural deck and load-bearing applications.



Key Features

- B-deck and structural deck profiles
- Pre-cut or post-cut options
- Custom roll tooling design
- High-strength material compatibility

Integrated Production Capability

Designed to connect every stage of your production process into a seamless, efficient workflow.

Built to align with your full production flow, from material entry to finished product handling, Samco solutions help improve efficiency, production control, and overall throughput.

Built for Construction Manufacturing

- Custom roll tooling designed to your exact profile
- High-speed production aligned with volume requirements
- Multi-material compatibility including steel, aluminum, and coated materials
- Inline punching, notching, and cut-to-length integration
- Automated stacking and downstream handling

From Concept to Production

Samco supports your team across every stage of development and production.

- Profile development and validation
- Prototype tooling and testing
- Turnkey line installation and commissioning
- Operator training and ongoing support
