

PARETO

BY SAMCO

The Digital Backbone of Roll Forming

Pareto is the all-in-one machine control and production optimization platform built exclusively for roll forming. Developed by Samco — the OEM that knows your machines better than anyone — Pareto connects your machines, people, and processes to deliver real-time intelligence from the shop floor to the top floor.

Smarter machines. Seamless integration. Measurable results.

MEASURE THE DIFFERENCE PARETO MAKES

15–20%

Average OEE Improvement

50%+

Reduction in Unplanned Downtime

30%

Fewer Scheduling Errors

STILL RUNNING ON DISCONNECTED SYSTEMS?

Fragmented data. Manual scheduling. Reactive maintenance. Siloed controls.

These aren't just inefficiencies — they're costing you throughput, quality, and revenue every single day. Pareto was built to eliminate every one of these pain points in a single, unified platform.

One platform. Zero blind spots.

BUILT TO HELP YOUR TEAM

Improve production visibility

Respond faster to downtime

Reduce manual tracking

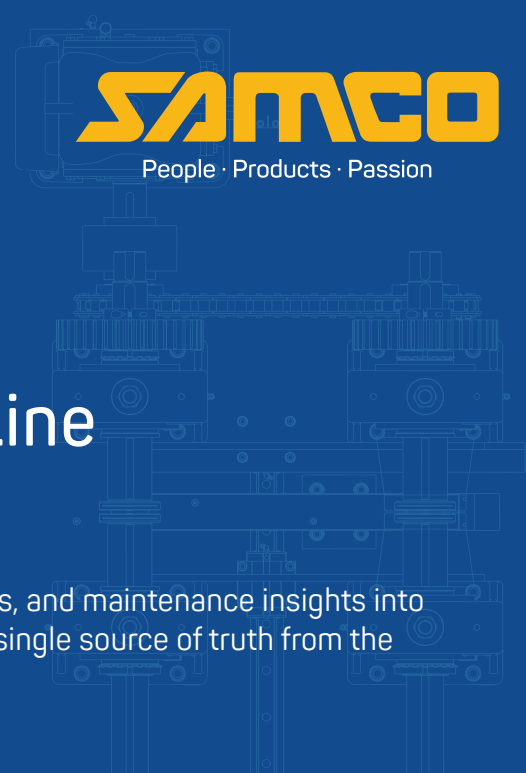

Make better operational decisions

Support continuous improvement

PARETO

BY SAMCO

Everything Your Roll Forming Line Needs. One Platform.

Pareto connects machine activity, production workflows, quality checks, and maintenance insights into one intelligent manufacturing platform — giving every team member a single source of truth from the shop floor to the boardroom.

PLATFORM CAPABILITIES

Real-Time OEE Monitoring

Live dashboards, downtime tracking, and automatic Pareto analysis so issues are caught and fixed immediately.

Predictive Maintenance

Continuous machine health monitoring shifts you from reactive to proactive, reducing unplanned stoppages by 50%+.

Automated Scheduling + ERP Integration

Work orders flow directly from your ERP to the machine, eliminating manual entry and scheduling errors.

Quality & Traceability

In-line quality checks and full production traceability for every run — from raw material to finished part.

AI-Driven Analytics

Cloud-ready architecture that learns from your data to surface the most impactful improvements over time.

Unified Machine Control + MES

Production, quality, maintenance, and analytics in one system — replace your fragmented tech stack for good.
